and make some noise for women's cancers!

Customizable Flyer

Hosting a screening?
Download our customizable flyer,
fill in the details of your event,
and post it around town!

Postcard

It can be difficult to remember everything we should ask on that annual visit to the gynecologist. The following list of discussion points and questions come from the doctors of N.E.D. to use as a guide during your appointment. Don't assume that your doctor will tell you everything you need to know. Listen to your body and take control of your own health!

Questions for your GYN:

- Discuss your menstrual cycle and bleeding pattern. Is it within the normal range?
- Discuss any vague symptoms such as abdominal pain, discomfort, changes in your bladder and bowel function, bloating, acid reflux, and weight gain/loss.
- Ask your Doctor if he/she felt anything abnormal during your pelvic exam.
- Discuss your family cancer history. Does it raise any concern for genetic syndromes?
- What, if anything else, should be done given your exam results?

Be DOWN THERE Aware!

Know the signs and symptoms of gynecologic cancers:

Ovarian—Honey, this is not just gas!

Uterine—Spotting after menopause is *NOT* your period!

Fallopian—Lots of watery discharge does not mean your hoo-hoo is well hydrated!

Vulvar—That little itch could be telling you something!

Vaginal—Dots, clots, and new white spots!

Cervical—Bleeding after hanky-panky should make you cranky!
