

NO EVIDENCE OF DISEASE

QUICK ACTION GUIDE

Read, watch, and share to spread awareness...

THE FILM:

In 2008, six cancer surgeons from around the country discovered their shared passion for medicine extended to music. What began as a one-time gig playing cover songs for fellow surgeons turned into a rock band, named for the words every cancer patient dreams of hearing, No Evidence of Disease (N.E.D.).

The award-winning documentary of the same name, **"No Evidence of Disease,"** interweaves the harrowing experiences and remarkable courage of women, devoted families, and these dedicated musician-doctors. As music and medicine join forces in the fight for life, the surgeons are transformed into rising rock stars, and their patients and loved ones jump on the bandwagon, infusing the struggle for survival with heart, hope and Rock 'n' Roll.

THE FACTS:

Over 90,000 women in the U.S. are diagnosed with a GYN cancer each year. About 29,000 women die annually.

Worldwide, nearly one million women are diagnosed with a GYN cancer annually. Over half of these women will die.
